Summary

Final-year B.Tech student and SIH 2025 Winner with hands-on experience in **Java, MERN, Flutter, REST APIs, SQL, and DSA**. Skilled in building cross-platform applications, integrating **cloud services**, and contributing to open-source projects.

Education

Modern Institute of Technology and Research Centre (MITRC), Alwar

2022–2026

B.Tech in Computer Science, CGPA: 8.92

Technical Skills

- **Languages:** Java, Python, JavaScript, TypeScript, PHP
- **Frontend:** React, Tailwind CSS, Flutter, HTML/CSS
- **Backend:** Node.js, Express.js, Spring Boot, REST APIs
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud & Tools:** Firebase (Auth, Firestore), Google Cloud, Vercel, Git, GitHub, Postman, Figma
- **Core Concepts:** Data Structures & Algorithms, Operating Systems, Object-Oriented Programming

Projects

City Guardian – AI-Based Civic Monitoring App

Oct 2025 – Present

GitHub

- Developed a Flutter app with TFLite for real-time pothole detection (90%+ accuracy).
- Visualized 50+ potholes using Google Maps API with live location mapping.
- Integrated Firebase Auth + real-time DB sync for seamless reporting.

SAT-VEX – Satellite Tracking Footprint Prediction System

Nov 2025 – Dec 2025

GitHub | Live Site

- Engineered a **TLE + SGP4** based satellite tracking system with 3D visualization in CesiumJS.
- Integrated ML-based correction models trained on 500+ TLE samples, reducing prediction deviation by 10–15%.
- Added ground-footprint estimation for communication, imaging, and surveillance satellite coverage analysis.

AgriMitra – Smart Farming & Crop Advisory Platform

Jun 2025 – Jul 2025

GitHub | Live Site

- Designed MERN platform for AI crop recommendations (90%+ accuracy).
- Processed plant disease images in 1–2 seconds using ML inference.
- Improved UI/UX via React + Tailwind, boosting responsiveness by 35%.

Experience

Full Stack Web Development Intern – CodeUnia

Remote | Jul 2025 – Aug 2025

- Built AlgoQuest, a MERN-based platform for visualizing sorting, searching, and graph algorithms.
- Implemented **12+ interactive modules** with Monaco editor, difficulty filters, and step-by-step highlights.

Achievement

Winner – Smart India Hackathon (SIH) 2025

National Level

- Won SIH 2025 at the national level among 10,000+ teams.
- Developed an AI-based space-weather and CME risk-assessment platform.
- Designed backend APIs and contributed to full-stack development across Python ML and Flutter modules.

Certifications

Advanced Java Programming – Skill Oceans

Jun 2024

Full Stack Web Development – Upflairs

May 2025
